June-July 2011

The Antique Automobile Show in Austin, Texas

On June 19, 2011, I shot some video at the 11th Annual Antique Automobile Show held here in Austin, Texas. We had a great time. There were cars from the 1930's, 40's, 50's, and 60's. There were some in great condition, others were just old but still around and running great. There were cars that took me back to the time my dad drove a big Buick Special and my grandfather drove a late 40's Dodge. At the end of the video (and the picture below) you will see a 1949 Ford with a Flathead V-8 engine. I'll bet some of you remember what that sounded like when equipped with a set of glass pack mufflers!

Click here to view the video. It's a little over six minutes long.
