Visiting William Jefferson Clinton

In January, we drove to Little Rock, Arkansas in our continuing quest to visit every presidential library. So far, we have visited the libraries of Presidents Hoover, in West Branch, Iowa, Kennedy, in Boston, Massachusetts, Johnson, in Austin, Texas, Nixon, in Yorba Linda, California, Reagan, in Simi Valley, California, and Carter, in Atlanta, Georgia, and now, the Clinton Library.

Little Rock reminds me of Austin many years ago and before the endless drought. The Arkansas River runs through the downtown area. Little Rock is the state capital, and the University of Arkansas Little Rock campus is near the capitol complex. Just like modern-day Austin, condos are going up along the river near the downtown area. There's a pretty nice entertainment district too; sort of a mini-Sixth Street.

Here are some photos taken in and around the William Jefferson Clinton Presidential Library in Little Rock, Arkansas. Next on our list is the George H.W. Bush Presidential Library in College Station, Texas.

The William Jefferson Clinton Presidential Library is directly across the river from downtown Little Rock, Arkansas. The gift shop and store are located a few blocks away in downtown Little Rock.

Photos by Robert Leos: “The bridge to the 21st century.” The old bridge that spans the Arkansas River is now a pedestrian walkway. The presidential limo. A replica of the oval office (every presidential library has one). Part of Clinton’s autographed guitar collection.
